Falls Prevention Alliance Australia

Dear [Member of Parliament's name],

On behalf of [Organisation], I am writing to express our support for the **Falls Prevention Alliance Australia** and its call for greater government action on falls prevention.

Falls are a major public health issue in Australia, with one in three older Australians experiencing a fall each year, costing the healthcare system $5.7 billion. Falls can have a significant impact on people's health, independence and quality of life, while placing considerable pressure on our health and aged care systems.

Through our work with [older Australians / health professionals / local communities], we see first-hand the importance of preventing falls and supporting people to remain active and independent.

> ***Add a short statement about why falls prevention matters to your organisation -*** *You may wish to share an example from your work, experiences supporting people affected by falls, or explain why falls prevention is important to the communities or groups you represent.*

As a supporter of the Falls Prevention Alliance Australia, [Organisation name] recognises the importance of a coordinated approach to falls prevention, and invite you to support the Alliance's Call to Action, including:

- A national falls prevention awareness campaign
- A National Action Plan for falls prevention
- Better access to evidence-based falls prevention programs, including strength and balance exercise

We encourage you to read the Alliance's Call to Action and consider how you can support these recommendations and help make falls prevention a national priority.

We would welcome the opportunity to hear your thoughts and discuss how governments can work with organisations such as ours to reduce the impact of falls across Australia.

Thank you for your time and consideration.

Kind regards,
